

# Suppliers, Vendors, Service providers and Contractors HSSE Requirements

Mubadala Energy is an industry leader in HSSE performance and Operational Excellence, thus, everyone who works with us must do so with diligence and have regard for the integrity of our assets, the health, safety, and security of persons affected by their work, the impact to the environment and reinforce our shared commitment to quality.

Our suppliers, vendors, service providers and contractors play a substantial role in delivering our HSSE performance. In order to sustain and enhance our HSSE performance, we require them to adhere to the following:

- Comply with all applicable safety and occupational health legislation in the country(ies) of export and import.
- Maintain necessary certifications, approvals, consents in compliance with legislation of the country(ies) of export and import.
- Ensure the supply of products are safe, with no risk to health at all times from implementation, commissioning, operation, use, cleaning, or maintenance.
- To ensure any lifting equipment supplied, including cranes, mechanical lifting devices, chains and ropes are examined, tested, and certified in accordance with legislation of the country(ies) of export and import before dispatch to Mubadala Energy.
- To provide suitable appropriate information and instructions relating to the use, maintenance, storage, and disposal of Products being supplied, to ensure that they are safe without risks to health and safety.
- To provide Mubadala Energy with relevant updates concerning occupational health and safety risks to the information provided under paragraph e.
- To provide appropriate Safety Data Sheet (SDS) for any hazardous materials, and such materials must be properly packaged and labeled in accordance with legislation of the country(ies) of export and import.
- Implement a business continuity plan to align with Mubadala Energy's Business Impact Assessment (BIA), with Products maintained in reserve to supply during disruptions.
- To ensure timely advice to Mubadala Energy in the event of supply chain disruptions.
